

Materials list:

12-15 kilos of white water based clay, low fire earthenware, usually tan or beige in color (the lighter the color the better), unglazed.

Per student

Small hand mirror-unframed is best, just a 10x20 cm rectangle of mirrored glass is best, though cheap hand mirrors in plastic frames are generally available.

Plumb line-a piece of thick string, about 1 meter long, with a weight like a hardware nut or washer on one end.

Plastic bin bag to cover clay work.

Clay tools-ideally students should bring their own, but having loaners on hand is good. I will send you a few links regarding these. Also a few small sponges and a few small bristle brushes are handy too.

A pencil.
