

**Landscape Painting with Edward Sprafkin March 2026**  
**Saturday, March 7th**

10 am to 2 pm  
\$50 Members/\$60 Non Members

Students will learn the principles of creating depth-filled atmospheric landscape paintings. Edward will address design, value structures, and atmospheric perspective as students work from their reference material. Note: Demonstrations will be in acrylic paints; students are welcome to work in their favorite medium. Participants should have a working knowledge of their medium of choice. Oil, acrylic, gouache, watercolor, and pastel artists are welcome.

**Supply List:**

Edward highly recommend water-mixable oils for their ease of clean-up and non-reliance on vapor-harmful solvents. If you use traditional oil paints, please use Gamsol Only and keep it capped when not in use. He will be working in either acrylic or gouache paints for the demonstrations; however, you are free to use your paint of choice.

You are encouraged to use your reference, but he will have a collection of photos for you to work from as a backup.

**Canvas:** Acrylic-primed in a variety of sizes for oil and acrylic paints.

**Cold Press watercolor block:** for gouache and watercolor paints.
